Report of Two days Science Academies Lecture Workshop organized by Department of Botany 16th -17th November 2022

Day I: 16th November 2022

Inaugural session

In the Inaugural session the welcome note began with our honourable Principal throwing light on the Mangrove Plantation at G-20 summit in Bali by leaders of various Nations focussing upon the importance of the tree plantation. Prof Khare highlighted the importance of trees and vocalized that if deforestation is not taken seriously not in millennia but in centuries, we may destroy the environment beyond repair.

After the welcome note, the Chief guest, Prof RS Verma, Director MNNIT, Prayagraj, launched the Abstract book titled "Climate Change: It's impact on Environment and Biodiversity. He emphasised how luxurious changes don't bring long-term happiness as seen in the form of ozone thinning and environmental destruction. Therefore, it's the duty of the citizens to focus upon sustainable developments.

Later, our Patron, Ch Jitendra Nath Singh, focussed upon the delay of monsoon due to Climate Change and how the trend of small houses and big gardens have been transformed to big houses and small gardens.

Lecture Session I:

First Lecture Key Note Lecture by Prof. R. R. Rao, FNA

Bioprospection” in which he elaborated upon the biodiversity of India ranging from North to South and East to West. He remarked how ancient people used to be curious about plants by citing the example of Sanjeevni buti and the discovery of the malarial drug ‘Cinchona’ and latex. He also lauded about the DRDO developed hand grenades containing extracts of the chilly plant “bhut jolokia”. Dr. Rao concluded by saying “in the coming decades, the biodiversity rich nations which are going to be able to convert biological wealth through bioprospection are going to be the richest and powerful nations in the world”. His session was chaired by Prof. Sunil Chaturvedi, ISC President, Plant Sciences section 2023 and the rapporteurs were Dr. Manju Srivastava, Professor, Department of Botany and Dr. Babibta Agarwal, Associate Professor, Department of Chemistry.

Second Lecture: **Prof. U.C. Srivastava, FNASc**

The second lecture was delivered by **Prof. U.C. Srivastava, FNASc** on the topic “Causes of Climatic Change” in which he described the difference between weather and climate and their relation with global warming. He discussed the global increase in temperatures and the sea level due to it along with homeostasis disturbance and correlated it with high death rates in summers in Prayagraj in the recent past due to heat waves. He also said that not only increased use of chemical fertilizers and insecticides but also the modern-day food habits, restaurant culture and lifestyle is also connected to the global increase in temperatures. He concluded by

He elaborated on the various types of biodiversity found all across the country. He further stressed on the need for conservation and awareness towards it by drawing our attention on the fifth mass extinction and stated that if “we don’t start acting responsibly by exercising population control we ourselves would be inviting the next mass extinction level event as appearing in the form of increased natural calamities as a proof”. He concluded the session by saying “conservation is important, not only economically but also ethically as all the species have a right to exist”. She told that how due to global warming the earth temperature is rising at a record speed and environment is completely dissatisfied and reciprocating in the form of earthquakes, floods and draught. Also, the effects are being observed in the form of agricultural damage and livestock deaths. She also drew our attention to the fact that areas which earlier declared to have eradicated various diseases such as malaria, dengue etc. have begun to report the reoccurrence of these diseases. She concluded by stating that for a safe survival we must act now. The session was chaired by **Prof. Shashi Pandey Rai** and **Dr. Alok Kumar Singh** and **Dr. Kirti Raje Singh** were the rapporteur of the session

REPORT

Plantation play a very important role in cleaning the climate by absorbing carbon di oxide from the environment and releasing oxygen against increasing temperature of the earth. Instead of this plant also reduce soil erosion, cleans air, conserve energy etc. Beautification Committee, Green Campus Committee and Green Youth Brigade Club CMP. Degree College Prayagraj organized Plantation programme on the occasion of Van Amrit Mahotsav on 26 August, 2022.

The programme was held under the supervision of Dr. Archana Pandey more than 100 students participated in the programme.
